Profile Summary

- Final-year B.Tech CSE (AI/ML) student who has shipped **production LLM pipelines** for real clients – scraping, generating and voicing content for **48,000+ museum artefacts** at an IIT Delhi-incubated startup.
- Hands-on with **RAG, LLM fine-tuning, explainable ML (XGBoost + SHAP)** and privacy-aware data handling on **multi-million record** datasets.

Education

UPES, Dehradun

B.Tech in Computer Science and Engineering (Specialization: AI/ML) – CGPA: 8.65

Aug 2023 – May 2027

Dehradun, Uttarakhand

St. Xavier's Sr. Sec. School, Delhi

Class XII (CBSE) – Science with Computer Science – 90%

Apr 2019 – May 2021

Delhi

Technical Skills

Languages: Python, SQL, C++

ML / Data: Scikit-learn, XGBoost, SHAP, Pandas, NumPy, Geospatial Analysis

GenAI / NLP: RAG, LLM Fine-tuning, Prompt Engineering, Semantic Search, Hugging Face Transformers, LLaMA, Sentence-BERT, FLAN-T5, DistilRoBERTa

APIs & Tools: Gemini API, Sarvam TTS API, Web Scraping, Git/GitHub, Jupyter, Google Colab, VS Code

Work Experience

IWayPlus Pvt. Ltd. (IIT Delhi-incubated)

Machine Learning Intern

June 2026 – July 2026

New Delhi, India

- Built an **end-to-end AI audio-tour pipeline** for the **Salar Jung Museum**: scraped and structured **48,000+ artefacts**, generated 4-tier descriptions (hook / short / medium / detailed) with **Gemini 3.1 Flash-Lite**, and converted them to audio via **Sarvam TTS** for visually impaired visitors.
- Reused the pipeline for a second client, the **National Zoological Park, Delhi**, producing multi-length, accessibility-focused audio descriptions for every animal on exhibit.

Indian Institute of Technology (IIT), Kanpur

Research Intern

Feb 2025 – Mar 2025

Kanpur, Uttar Pradesh

- Built a **RAG-based sentiment analyzer** combining LLaMA with semantic search, improving retrieval relevance by **20%**.
- Fine-tuned small LLMs for emotion classification on **1,000+ journal entries**, improving label consistency across 4+ emotion classes.

Projects

Interpretable Crime Risk Assessment System | *Python, XGBoost, SHAP, Geospatial* | [Code](#) **Jan 2026 – May 2026**

- Engineered grid-based spatial hotspot detection over a **multi-million record** Chicago crime dataset to produce normalized hotspot scores.
- Derived High / Medium / Low risk labels from spatial intensity to train an **XGBoost** risk-prediction model.
- Added a **SHAP explainability layer** exposing per-feature contributions for every prediction.
- Implemented privacy-aware governance: **~100m coordinate masking** and role-based dataset views (public analytics vs. secure training).

RAG Journal Entry Sentiment Analyzer | *Python, Hugging Face, LLaMA, FLAN-T5* | [Code](#) **Feb 2025 – Mar 2025**

- Designed a **4-stage RAG pipeline** (preprocess → retrieve → classify → generate) for personalized journaling insights.
- Cut reflection-generation time by **15 seconds** and raised accuracy by **20%** using Sentence-BERT retrieval + FLAN-T5 generation.
- Integrated a **DistilRoBERTa** emotion classifier across 1,000+ user and historical entries.
- Automated an 8+ module NLP workflow (cleaning, tokenization, embedding, indexing).

Achievements and Leadership

- Round 2 Qualifier, EY Techathon 6.0** – Top 2,500 of 1,83,261 registrants; architected an AI-powered NBFC loan-approval chatbot with a gamified CIBIL score tracker.
- Scholar, SheFi Season 14** (Web3 & fintech cohort) | **Cisco BOOST 6.0** – Women in Cybersecurity.
- President, Aks** – Led 80+ members; ran operations and secured sponsorships. | **Sub-Head, Avishkarnam** – Managed 15+ writers.
